

Change Auditing and Reporting Solution for Microsoft Exchange

Microsoft Exchange Server is by a distance, the most popular communication, collaboration and email messaging application today. MS Exchange serves as the hub of all email communications in most corporate environments that use the Microsoft Active Directory technology. It has become a necessity to have an Exchange reporting tool that will equip an Exchange administrator with precise, granular, comprehensive and actionable data on all aspects of the MS Exchange Server.

Get instant reports on mailbox traffic, permissions, etc.

ExchangeReporter Plus is a ready-to-deploy reporting and analysis solution for your Exchange servers. With this tool you can,

Monitor all aspects an Exchange email infrastructure

Audit critical changes to mailbox permissions or properties

Get alerts about critical changes or events

Track mailbox logon or non-owner mailbox logon

Track what users keep in their mailboxes

In essence, ExchangeReporter Plus is a tool that will

Help you understand your Exchange infrastructure better

Provide stats that help improve Exchange management

Secure the organization's email infrastructure

100+ Comprehensive Reports

Reports that throw light on every aspect of Exchange and the exclusive audit feature together make it the most fitting reporting solution for your organization's Exchange environment

Mailboxes Report

Obtain consolidated reports on mailboxes in your Exchange environment. Be it mailbox size, growth or permission changes associated with a mailbox, ExchangeReporter Plus brings you the essential insights on them all.

Public Folder Reports

These reports bring you statistics relating to 'Public Folders' usage and availability. The general reports shed light on available Public Folders, Public Folder replicas, the mail enabled ones and details on Public Folder size.

Email Traffic Reports

Email traffic monitoring is the heart of Exchange reporting. These reports gather the statistics pertaining to email traffic in your organization and consolidate them into actionable reports.

ActiveSync Reports

Use these reports to obtain ActiveSync policy details, device details and ActiveSync status information on every ActiveSync enabled mobile device in your organization.

Storage Reports

The Exchange store handles copious amount of data relentlessly. It is crucial to keep tabs on the size & growth of Exchange information stores. The storage reports will keep you abreast of the same.

OWA Reports

Put these reports to use for gathering OWA data. Details of users logged on using OWA, their IP addresses, browsers used for the access and top servers used for logging on can be attained using these reports.

Distribution Lists Reports

ExchangeReporter Plus brings you vital information on distribution lists such as membership details, Inactive lists and arrays the top distribution lists by message & size.

Organization Reports

This category of reports will fetch you all the essential statistics on the Exchange organization neatly grouped under three sections of reports - General, Store and Server reports

Audit Reports

Ever felt the need to keep a keen eye on changes occurring in your Exchange environment? Here is a feature that would let not even a minor change made to your Exchange environment, escape your attention – Exchange Auditing! Four reports are offered under this category

Mailbox Logon

Closely monitor user logon patterns and bring to light any unusual logon behavior using the mailbox logon report. This report helps in exposing any non-owner mailbox logon activity, enabling an administrator decide what actions to take.

Exchange Store Changes

Get reports on Exchange stores mounted or dismounted during a specified time period. You also have an option to view these reports simultaneously, using the 'User action on Exchange Stores' report.

Mailbox Permission Changes

Probe into changes in mailbox permissions. Obtain complete list of access control entry values after and before the change in settings using the reports under this category.

Mailbox Property Changes

Keep a vigilant eye on mailbox property changes such as quota changes, size restriction changes, activated mailboxes, deactivated ones and moved mailboxes using this class of reports.

Customize Your Reports!

Exchange audit reports are exceedingly customizable. Create your own view for any of the audit reports in a few simple steps. Another useful feature is the "Custom reports". ExchangeReporter Plus allows you to create customized reports under category of your choice.

Configure Alerts!

Configure alerts for events that require your immediate attention and get notified on the same immediately upon logging into the product. Rest assured, no arguable event will escape your attention with this feature! You also have an option to create customized alerts.

“ It was difficult to find out Exchange mailbox sizes and carry out capacity planning. ExchangeReporter Plus helped us, and we were able to decrease mailbox sizes and not add to disk. And this tool was well within our budget ”

Renee Davis
CIO, Life Management Center,
Florida.

“ As a system for an enterprise, I can say that ExchangeReporter Plus is a great and easy tool to track your Exchange environment, using a friendly web-based analysis UI. With this tool, it is easy to get mail traffic stats, mailbox sizes and properties. Very useful. ”

Tzachi Elkabatz

“ We needed granular reporting on Exchange to get a better understanding of the environment itself, so that we could begin to change various projects for this core service use. Exchange Reporter Plus gave all this - without having to depend on powershell scripting. ”

Shannon Rubin
