

MONITOR YOUR MS EXCHANGE ENVIRONMENT UP CLOSE

What is ExchangeReporter Plus

ExchangeReporter Plus is a **Change Auditing and Reporting Solution** for MS Exchange environment. This software consolidates the statistics pertaining to an organization's email infrastructure and presents it to the administrator in the form of actionable reports, graphs and charts. With its capability to audit crucial permission or property changes, ExchangeReporter Plus will be the most fitting solution for your organization's Exchange requirements.

Do you know about the **Free Version** of ExchangeReporter Plus ?

The free version of ExchangeReporter Plus comes with fully functional 'Standard Edition' features, without expiry & 24*5 technical support. And what's more, you can monitor **25 Exchange Mailboxes** for free!

Salient Aspects

ActiveSync traffic analysis | Custom recipients traffic monitoring | Reporting on Outlook Web Access usage | Mailbox & public folder content detection | Detailed storage reports for mailbox/public/server stores | 100+ automated reports to manage your Exchange deployment | Mailbox Traffic analysis by size & number of messages exchanged | Audit feature to investigate unauthorized mailbox logons & other critical changes | Compiled information on permissions associated with mailboxes & users

Easy Deployment

ExchangeReporter Plus is a ready-to-deploy reporting and analysis solution for your Exchange servers. The deployment takes minimal time and in minutes you will be monitoring your Exchange environment up close!

Cut Back on Time

100+ automated reports that extract "must know" Exchange information and bring to notice in times scheduled by you. These also include summary reports with graphical views and bar charts.

Change Auditing for Augmented Security

The product offers complete change auditing by tracking the changes that happen in the Exchange system. All actionable data from the 'Event Viewer logs' are converted into easy to read reports, graphs and views, thus making sure that no questionable event eludes your attention.

Quick Decision Making

The product welcomes you with a graphics dashboard that displays server usage, traffic summary, top 10 mailboxes, alerts and more! As this would be the first thing you see, you can make well informed decisions

Transparency

Not a single aspect of Exchange will escape the watchful eyes of Exchange Reporter Plus. Be it information on distribution lists, public folders or OWA usage - there are reports on every one of them. These reports will ensure utmost transparency of your Exchange environment.

Optimal Resource Utilization

Often the case with many resource rich enterprises is simply not making the best of it. By scrutinizing the drilled down reports ExchangeReporter Plus provides you with, you can utilize your resources more wisely.

Improved Monitoring

Monitor closely the size and growth of Exchange storage objects. Learn which mailboxes send and receive maximum email messages, and the exact amount of email traffic handled by individual servers in your organization.

Stay Informed, Stay Alert!

You don't want nasty surprises! Instead of stumbling upon critical events one fine day, configure alerts for events that require looking into and perform necessary actions at once.

It was difficult find out Exchange mailbox sizes and carry out capacity planning.

ExchangeReporter Plus reports helped us, and we were able to decrease mailbox sizes and not add to disk. And this tool was well within our budget

- Renee Davis

CIO, Life Management Center, Florida.

We needed granular reporting on Exchange to get a better understanding of the environment itself, so that we could begin to change various projects for this core service use. Exchange Reporter Plus gave all this - without having to depend on powershell scripting.

- Shannon Rubin
